

M Reme Silvestre

Monovar, Alicante, 1992
Lives and works in Valencia.

M Reme Silvestre's work is more about discovery than creation. It refers to common ideas, to contexts and experiences of a contemporary moment. The central idea that runs through her production revolves around the different notions of the body and leads to consider inseparable the physical relationship of the work with the spectator, with the space itself and in turn, with the route that causes.

Silvestre defines herself as a generator of integral experiences, which lead to a different way of occupying space, of inhabiting it. In this way, through changes of rhythms and attitudes, she manages to put the viewer in tension, questioning the reason of this discomfort. His work proposes an open, concise and forceful image, without imposing precise meanings, but elements that generate a set of signs that lead us to other signs.

She has developed projects in institutions such as: Centro-Centro, Palacio de Cibeles – Madrid, Blue Project Foundation – Barcelona, Museu d'Art Modern i Contemporani – Palma de Mallorca; IVAM Valencia, CCCC Valencia, Pols Valencia, La casa encendida – Madrid, Fabra i Coats – Centre d'Art Contemporani – Barcelona, Museo Es Baluard. – Mallorca, Las cigarreras – Alicante.
